

## GRADUATION RATE

**Graduation rate (GR)** summarizes the proportion of students who completed their program within a specific percentage of the published program length (3 years) to the number of students in the **entering cohort** who are eligible to graduate (IPEDS):

$$GR = \frac{\text{\# of students who completed their program within a specific percentage of normal time to completion}}{\text{\# of students in the entering cohort}}$$

The graduation rates are shown in Table below.
